Mohammed Jameel Shahid

+91-9346388036 | moshahid0324@gmail.com | LinkedIn | GitHub | Portfolio | Ramagundam, Telangana

Technical Skills

Languages: JavaScript, TypeScript, Python, C#, SQL, HTML5, CSS3
Frontend: Next.js, React.js, Nuxt 4, Vue.js, Tailwind CSS, Redux, Zustand, TanStack Query
Backend: NestJS, Node.js, Express.js, Django, FastAPI, .NET, Azure Functions, REST APIs, WebSockets
Databases: MySQL, PostgreSQL, MongoDB, Redis, Prisma ORM, TypeORM
Cloud & DevOps: Azure Functions, Azure Static Web Apps, Azure DevOps, Azure AD, Docker, Kubernetes (basic), CI/CD, GitHub Actions, RabbitMQ
Testing & Tools: Pytest, Playwright, Postman, API/E2E Testing, Claude Code, Cursor, Git
Auth & AI: OAuth 2.0, JWT, Auth.js, RBAC, OpenAI, Claude, Gemini, Vercel AI SDK

Work Experience

PropertyLoop Apr 2026 – Sep 2026
Fullstack Developer *Remote*

- Modernized internal dashboards in React with business and design teams, overhauling the UI and resolving defects to improve usability.
- Built serverless pre-call routing (Azure Functions, NestJS, MySQL) that identifies the correct surgery site from inbound caller numbers and selects configured recordings for multi-location surgeries; validated releases with QA smoke testing.
- Developed an Azure Function for fuzzy patient matching against encrypted roster data, optimizing surname/postcode queries and handling unique vs. ambiguous matches before PDS lookup; helped reduce EMMA call duration.
- Implemented a unified patient-feedback workflow across four repositories for SOFIA and NINA: NestJS feedback APIs, multi-bot Slack notifications, CMS integration, and an Azure Function to surface orphaned NINA feedback.
- Built and deployed an internal developer-resource platform (Next.js, Azure Static Web Apps, Azure DevOps CI/CD) with company-only Azure AD authentication.

Codseg / Paradigm Shift AI Jan 2024 – Jan 2026
Fullstack Developer *Remote*

- **Django API Testing Platform:** Built an API test suite for a large-scale DOE Django application using Pytest, Postman, and Playwright, reaching ∼90% endpoint coverage across 80+ routes; added E2E UI tests that surfaced critical regressions before production.
- **AI Quiz Platform:** Built full-stack features for 300+ users: UI modules, survey pipelines, and topic-specific quiz generation (Prisma, PostgreSQL, NextAuth, prompt engineering).
- **PromptVault:** Built a secure multi-LLM platform integrating OpenAI, Anthropic, Gemini, Mistral, Llama, Stable Diffusion, ElevenLabs, and Exa AI; optimized chat rendering for 100+ messages.
- **PennyFlo:** Added AI-driven invoice generation with structured JSON streaming (Vercel AI SDK) and PDF annotation highlighting exact SoW clauses.
- **AI Agent Benchmarking Platform:** Built an AI-agent benchmarking platform with RBAC, Auth.js, Redis caching, and a Dockerized FastAPI backend run via Argo Workflows.

NxtWave Disruptive Technologies Jul 2023 – Jan 2024
Teaching Assistant & Frontend Mentor *Remote*

- Mentored 300+ students in React.js (lifecycle, hooks, state management) and REST API integration.
- Debugged 500+ student codebases, identifying common anti-patterns in async logic, event loops, and promises.

Photomath May 2022 – Jul 2023
Math Expert *Remote*

- Solved 1,000+ complex problems across calculus, algebra, geometry, and statistics with clear step-by-step solutions.
- Maintained a 95% quality rating through detailed, easy-to-follow explanations.

Projects

FinTech Core API | *NestJS, TypeScript, PostgreSQL, TypeORM, Redis, RabbitMQ, Docker* | Source Code

- Event-driven FinTech REST API with ACID-compliant double-entry ledger, pessimistic row-level locking, and alphabetical UUID sort for deadlock-free transfers.
- Cache-Aside Redis caching cut balance-check latency from ∼15ms to <1ms; decoupled transactional emails via RabbitMQ and a background worker.
- Hybrid Passport JWT auth (httpOnly cookies and Bearer tokens); PostgreSQL, Redis, and RabbitMQ containerized with Docker Compose.

Freelance Flow | *Next.js 16, FastAPI, PostgreSQL, Zustand, OAuth 2.0* | Source Code

- Invoicing and time-tracking platform that generates PDF invoices from billable hours, cutting manual billing time by ∼50%.
- Zustand for timer state, TanStack Query for server sync; OAuth 2.0 and JWT in HttpOnly cookies; ReportLab for PDFs.

Education

Kakatiya Institute of Technology and Science 2013 – 2017
Bachelor of Science in Mechanical Engineering *Warangal, India*
